

# Least Product (2x2)

You will need: 2 sets of number cards 0-9, white boards & markers (or journals), a calculator

1. Each player is dealt four cards.
2. Arrange your cards to make a two-digit by two-digit multiplication equation. The goal is to make the least product possible.
3. Solve the multiplication equation.
4. Check your partner's product using a calculator.
5. The player with the least product gets 1 point.
6. The 1<sup>st</sup> player to score 10 points wins!

$$\begin{array}{r} 27 \\ 52 \\ \hline 97 \times 52 = 5,044 \end{array} \quad \leftarrow \text{Round Winner!}$$

$$\begin{array}{r} 84 \\ 69 \\ \hline 96 \times 84 = 8,064 \end{array}$$
