

# Decimal Buildings

You will need: Base 10 Blocks, journal, pencil

= 1

= .1

= .01

1. Take 3 minutes to create a 3-dimensional building using base 10 blocks.
  2. Quickly sketch your building and record the number of flats, longs, and units that you used.
  3. Calculate the total value of your building. Don't forget to show your work!
  4. Create another building by repeating steps 1-3.
- \*Bonus\* Calculate the sum of the values of your two buildings. Calculate the difference between the values of the two buildings.
