

$$\frac{44}{44} = 1$$

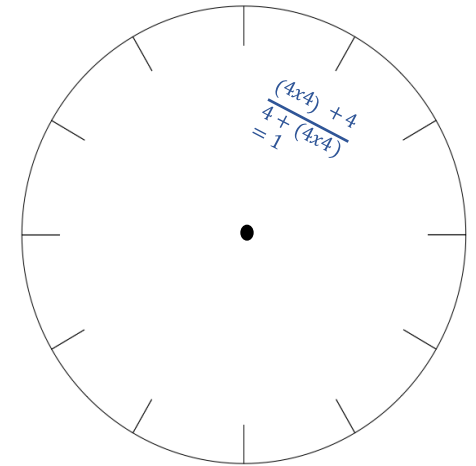

Expression Clock

5.OA.1

$$(4+4) \div (4+4)$$

Use the number 4 to create expressions that equal 1-12. Don't forget to use the order of operations when solving (parentheses, exponents, multiplication or division, addition or subtraction)!

Use the numerical expressions created to make an expression clock.

1 = _____

2 = _____

3 = _____

4 = _____

5 = _____

6 = _____

7 = _____

8 = _____

9 = _____

10 = _____

11 = _____

12 = _____
