

# Triangle Diagram (Sides)

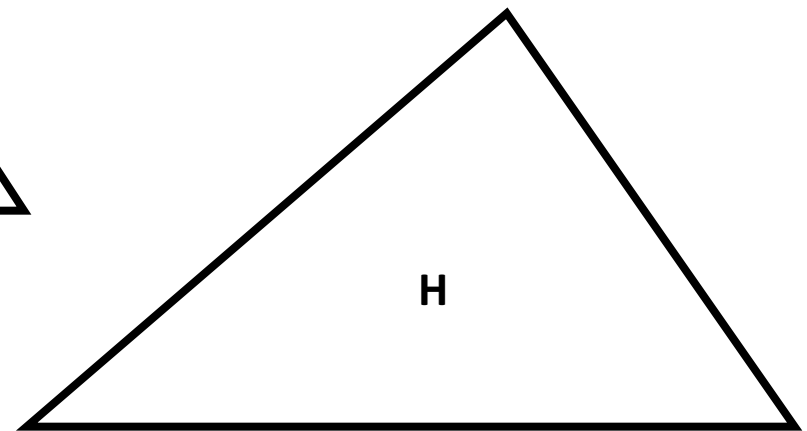

---

You will need: Triangle Resource Sheet, ruler, scissors, glue

1. Measure and label the side length of each triangle on the resource sheet.
2. Cut out the triangles.
3. Create a diagram with the following categories:
  - Polygons
  - Triangles
  - Equilateral Triangles
  - Scalene Triangles
  - Isosceles Triangles
4. Glue the triangles under the correct category on your diagram.
5. Using mathematics vocabulary, explain your reasoning to a classmate.
