## Rounding of the Nearest Hundredth

## You will need: digit cards ( $0-9$ ), 2 counters

1. Stack your digit cards upside down.
2. Each player picks four digit cards and arranges them with the counter after the first card to represent a decimal point.

$$
2,4
$$

3. Round your number to the nearest hundredth and explain your reasoning to your partner.

Ex. 2.417 is between $\underline{2.41}$ and $\underline{2.42}$ and is rounded to 2.42.
4. The player whose number rounds closest to 4.99 earns a point.
5. The winner is the first player to earn 10 points.
